Career Objective

I'm a frontend enthusiast skilled in **HTML, CSS, Tailwind, JavaScript, and React,** eager for challenging projects to hone my skills and innovate in a team setting.

Skills

- HTML
- JavaScript
- React
- Python

- CSS
- Tailwind CSS
- Firebase
- Git

Education

BSC in Computer Science and Engineering, *East West University* ⌐ 2019 Feb – 2024 Jan
Dhaka, Bangladesh

Projects

Roamify, : *React, React Router, Firebase, Tailwind CSS, DaisyUI* ⌐
Roamify is a user-friendly travel platform that brings the beauty and diversity of Southeast Asia to life. It allows users to explore various tourist spots and countries across the region, all from the comfort of their own devices. The platform is designed to work smoothly on any device and provides secure login with Firebase. Users can add their own travel spots, edit, or delete them, making the experience more personal. Roamify also offers light and dark modes for comfortable browsing and easy sorting options to help users find what they're looking for. With engaging animations and helpful tooltips, Roamify makes discovering Southeast Asia a fun and interactive experience.

Nutri-Cook, : *React, Tailwind CSS, DaisyUI* ⌐
"Nutri-Cook" is a culmination of my passion for frontend development and culinary exploration. Leveraging JSON data, I created recipe cards showcasing tantalizing images, ingredients, and essential details. With interactive features like adding recipes to the "Want to Cook" table and tracking preparation time and calories, "Nutri-Cook" offers a delightful culinary experience.
